

Scaffold Train the Trainer

This program provides the elements to develop a good Scaffold Safety Training Program to include:

- Determine Scaffold training needs
- Identify goals and objectives
- Develop learning activities (i.e., lecture, on-the-job, hands-on, discussion, or a combination of all of these)
- Conduct the training – each student will be responsible to develop and present an assigned topic on Scaffold Safety to the class and be evaluated on that presentation.
- Evaluate the Training Program

This course was developed and designed to educate participants to train about all aspects of 29 CFR 1926.450 Subpart L Scaffolds

Prerequisite:

In order to attend this course you must have completed the OSHA 3085 Principles of Scaffolding course within the last 12 months and provide the CRSC with a copy of your course completion certificate.

Every student will receive a student binder and a CD which includes:

- PowerPoint Presentations
- video clips
- test questions
- additional resource information for scaffolds
