

# OSHA 10 & 30 Hour for the Construction Industry

**Who should attend:**

Enroll in this course if you are interested in developing safety and health programs in construction industry to identify, evaluate and control hazards.

**What you will learn:**

- Which standards and regulations are a must to know and which work site conditions can hurt you the most
- How to use the OSHA regulations to prevent devastating injuries
- To recognize your company's safety needs
- How to be involved in real-world workshops to create usable solutions for realistic safety problems

**Why should you attend:**

Facilitators identify safety and health principles that help you meet OSHA requirements. Special emphasis is placed on areas in construction that most commonly result in worker injury or property damage. You are also briefed on basic instructional approaches, improving compliance communication, and developing work site activities that support safety on the job
