Class Time: AA`K€€æ { Ac [AGK€€] {

At the end of the training, the participants will be able to:

This course covers the identification, evaluation, prevention and control of fall hazards in the construction industry. The course focuses on falls to a lower level rather than falls to the same level resulting from slips and falls. Course topics include identifying, analyzing, and preventing fall hazards utilizing OSHA Fall Protection Standards. At the conclusion of the course, students will have an awareness level of identifying fall hazards and methods to control and abate the hazards.

- Identify factors that contribute to common fall hazards.
- Explain how to analyze work areas for fall hazards.
- Discuss hierarchy of controls for fall hazards.
- Describe OSHA regulations and resources addressing fall protection.

Requirements for Virtual Instructor Led Training (VILT) can be found at:
